PROFILE

Experienced Full-Stack Web Developer adept in all stages of web development. Knowledgeable in user interface and design, testing, and debugging processes. Bringing expertise in design, conceptualization, and maintenance of client- and server-side environments, with a diverse and expanding skillset. Proficient in a variety of technologies, including Javascript, jQuery, node.JS, and various CSS libraries. Experience in managing people and customers as well as self-management for tasks and projects, and in a team setting.

EMPLOYMENT HISTORY

Assistant Radiology Manager, Kaiser Permanente of Washington

Bellevue

May 2017 — May 2021

- Managed staff of 45 radiology techs over three clinical sites. Responsible for staff interpersonal issues, payroll, general departmental operations, recruiting and interviewing, and some budgeting.
- Provided effective support to hospital staff during routine settings and in crisis modes.
- Worked well independently, as a leader and with other members of the leadership team.
- Followed policies and procedures as required by multiple governing and regulatory bodies, culminating in regularly-scheduled inspections of the sites.

Lead MRI Technologist, Kaiser Permanente of Washington

Seattle

Aug 2015 — May 2017

- Worked as a team lead for a small group of MRI techs in KP's Capitol Hill site.
- Responsible for team schedule, supply ordering, maintenance recording and scheduling, and some interpersonal staff issue management.
- Worked with up to 20 patients a day providing excellent service, ensuring a successful and safe imaging study.
- Became knowledgeable in new techniques, standards, technologies, and trends in radiologic imaging.

MRI Technologist, Group Health

Seattle

Aug 2010 — Aug 2015

EDUCATION

Full-Stack Web Development Boot Camp Certification, University of Washington

Seattle

Jun 2021

PROJECTS

Personal Portfolio

This is an ever-evolving website that showcases the projects of which I'm proudest of in my new career as a web developer. This is a mainly static site, composed of basic HTML and CSS (with a bit of the Pure CSS library styling). This is to demonstrate my design skills; I consider myself a strong visual designer.

Calorie Replacer

This was a group project demonstrating handling API requests and managing them into data that is helpful and understandable to the end user. It takes user demographics along with exercise data and returns a food item they can make to replace the calories they burned. We used HTML, Javascript, jQuery, CSS and the UIKit CSS library.

Weather Dashboard

Weather Dashboard is a stylized website allowing the user to retrieve weather and forecast information for almost any city worldwide. It uses the openweather API request to retrieve the data. This app also stores recent searches into local storage for later use. I used HTML, CSS, Javascript and jQuery to create this app.
